## MEDICAL DEVICES

### TOLERANCE AND PERFORMANCE OF MEDICAL DEVICES

For more than 10 years, Pharmascan assesses the tolerance, the use and the performance of medical devices (MDs):

- in its different sites ISO 9001 certified and/or recognized by the authorities in France, Poland, Tunisia and Thailand,
- in hospital centres, private practices, or specialized services,
- through experienced international partnerships.

We advice you the trial sites according to your technical priorities, your deadlines, your markets and the applicable regulatory constraints.

### MEDICAL DEVICES WITH OR WITH OUT (CE) MARKING

- Dermatological care (ex. medicated cream, anti-mosquito biocide)
- Aesthetic devices (ex. dermal fillers)
- Healing products (ex. bandage)
- Hair produits (ex. anti-louse care)
- Gynaecological products (ex. anti-mycosis)
- Dental products (ex. mouthwash, toothpaste)
- ENT products (ex. nasal or auricular sprays, anti-snoring products)
- Support stocking (ex. socks, tights)
- Oral products (ex. nutrition, food supplement)

### MADE TO MEASURE TRIAL PROTOCOLS

In a regulatory environment in constant evolution, our clinical trials can meet the requirements of the Directive 2007/47/CEE on MDs and comply with ISO 14155 standard. Thanks to our experience, we offer custom protocols whose methodology is developed in collaboration with expert physicians, our specialist investigators and our biostatisticians. We are committed to the quality of our studies conducted according to Good Clinical Practices and to respect the deadlines in order to provide scientific and relevant services.
